✨ Design Unicorn ✨ bridging the gap between design and engineering

Experience

KeelWorks

UX Designer

Nov 2023 - PRESENT

Designed an HR tracking tool for improving workflows, onboarding automations, and employee placement.

- ◆ Created clarity by leading 3 cross-functional workshops
- ◆ Collaborated with engineering for clean hand-off, insuring consistency
- ◆ Leveraged patterns from the design system, resulting in 10+ new mockups

Trend.io

Full Stack Engineer

Feb 2022 - June 2022

Architected improvements and new features that helped in connecting 500+ content creators with businesses using React.js, HTML, CSS, and Javascript.

- ◆ Engineered features that boosted and improved user engagement by 20%
- ◆ Prioritized resolving bugs and customer issues, removing 90% of major bugs
- ◆ Diagnosed and spotlighted 14 different pain points with Mixpanel data

AssetDash

Frontend Engineer

July 2021 - Nov 2021

Crafted early stage product features for a Fintech startup that helps users track old investments and find new ones using React.js, HTML, CSS, and Typescript.

- ◆ Designed and coded a Admin dashboard, improving workflow speed by 40%
- ◆ Improved site accessibility by a 20% increase
- ◆ Generated more than 20 new components using Material UI

42 Ecole

Full Stack Intern

Feb 2020 - Nov 2020

Lead multiple student facing projects to improve student progress and connect students with free meals during Covid lockdown using Ruby on Rails.

- ◆ Implemented a food ordering CMS, helping staff deliver 200% more meals
- ◆ Designed and built a analytics dashboard, improving admin workflow by 90%
- ◆ Helped students by communicating policies and changes in curriculum
